## PoolLock

Our company has been producing pool covers for more than 30 years. PoolLock Automatic Safety Covers have proven their quality for more than 13 years in 21 countries.

PoolLock provides a flexible design for almost every swimming pool type and shape and offers above ground and concealed versions of mechanisms.

The wide range of our solutions enables us to tailor make your Safety Cover.

## Safety

**PoolLock safety covers protect children from pool related accidents.**

PoolLock Automatic cover is the safest, fastest and easiest way to secure your pool.

Just by turning a key you will close or open the pool in a few seconds, it is so easy that you will close the pool every time when it is not being used.

## Automatic Hydraulic Mechanisms

- Direct Driven Hydraulic system with 2 motors, without gearing or clutch increases the simplicity and reliability of the system
- Closing/Opening speed up to 3 sec/m
- Comply with all safety regulations for pool areas all around the world
- PoolLock does not need any electricity near the pool
- Easy operation by a single turn of a key
- Lockable operating switch

**PoolLock Automatic Hydraulic system can be used up to following cover sizes:**

<b>Hydraulic S</b>	13 x 6 m	(for small size pit)
<b>Hydraulic I</b>	13 x 6,5 m	(economic version)
<b>Hydraulic II</b>	14 x 8 m	(strong, high speed)
<b>Hydraulic III</b>	22 x 8 m	(for XL pools)
<b>Hydraulic IV</b>	25 x 11 m	(for XXL pools)

# MANUAL *safety covers*

## SEMI II

SEMI II safety cover provides the same safety of your pool as the automatic systems.

The cover opens and closes by operating two sticks ("ski-poles") back and forward. You open your pool within 1 to 3 minutes.

It is simple to install and does not require any electrical connection. It can be operated safely by a child.

SEMI II has the same options for alternative installations as the Automatic versions.

It is available in above ground and concealed version.

**Max. cover size: 13 x 6,5 m**

## Upgrade of SEMI II

SEMI II can be easily upgraded to the Automatic Hydraulic II system whenever you wish.

You can secure your pool for less money and later on change it to the Automatic system with a key operation.

Our technicians will bring the necessary parts and upgrade the system directly by your pool.

## MANUAL models

Mechanical, Manual and Manual S are the economical versions of safety covers to secure your pool.

It is quick and easy to use. Your pool can be opened and closed within 1-2 minutes.

The Mechanical version is operated by a crank handle in both directions. Both of the Manual systems are opened by a crank handle and closed by pulling ropes.

These manual models can be delivered only in above ground versions. Mechanical and Manual can be supplied with a standard PoolLock oak or polymer bench and Manual S can be fitted with low cost oak bench.

**Max. cover size Mechanical: 10 x 6 m**

**Max. cover size Manual: 12 x 6 m**

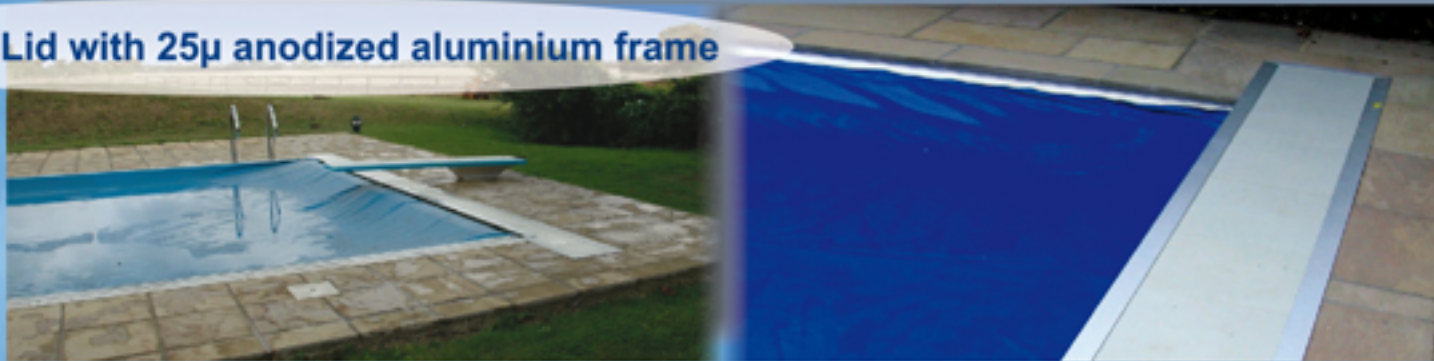

**Max. cover size Manual S: 9 x 4,5 m**

# LIDS & BENCHES

Tray for tilling - mechanism is fully concealed

OAK Lid made from slow-grown Czech oak

OAK Bench made from slow-grown Czech oak

OAK Bench can nicely fit to its surrounding

Polymer Bench w. 25µ anodized alu beam and frame

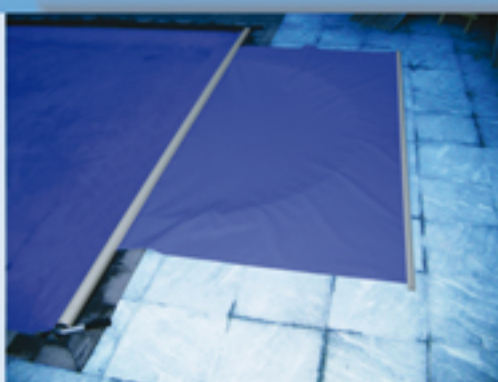

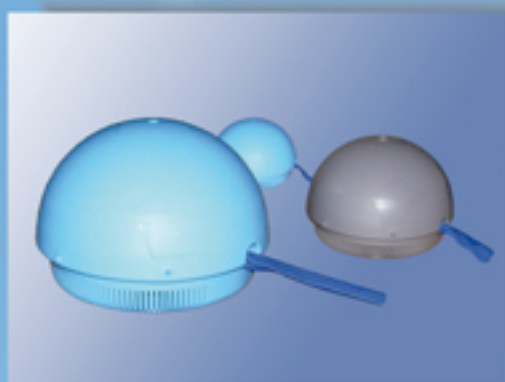

# SPECIALS

This special stair construction allows the usage of fully concealed tracks even at the stair area. It nicely covers the stairs and it is a safe and practical solution.

Integrated roman stairs cover is a solution for concealed systems with roman stairs (outgoing stairs). The stair cover is rolled up inside the leading bar by a handle and pulled out by hand.

Our NEW 12 V Cover "Ball Pump" has fully automatic functions. It is delivered in blue and gray color. It is totally safe to use in pool areas in all countries.

The "Ball Pump" has an unique weighting and filtration system, which together with the automatic functions enables the pump to drain all water from the cover.

The Winter tube is a nice solution for winterizing of your pool. The unique winter tube construction creates a dome, which enables you to lower the water level up to 0,5 m (almost 2 feet).

The Winter tube is strong enough to hold the weight of the snow. It is easy to fold up so it can be stored until the next winter without taking too much space.

The Minibench can be made from polymer panels with alu frame and also from oak. The height of the minibench is only 150 mm (6 inches).

With PoolLock minibench the leading bar and the cover can be totally hidden. It is strong enough to walk on.

The Antifriction Net is used to prevent sticking on coping stones and patio around the pool. It is welded on the under side of the cover.

The Antifriction Net is welded on the parts of the cover, which slide on the patio. For the even rolling it must be welded equally at both sides.

PoolLock cover can be modified for rounded corners up to 150 mm (6 inches) radius. Do not forget to inform us about your pool details.

PoolLock Automatic safety cover can be delivered with optional switches and controllers as well as safety remote controls.

# INFO

For installation, maintenance and annual service we have 5 service vans with trained technicians

## Basic facts

PoolLock has the widest range of Safety Covers to accommodate various swimming pool shapes, designs and sizes. PoolLock offers 14 types of mechanisms and 7 standard + 30 special colors of high quality cover material.
